DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

 Claims 1-2 are, drawn to a clamp in a semiconductor environment, classified in class 257, subclass 666+.

II. Claims 3-16, drawn to a structure, classified in class 439, subclass 73.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions while the invention I is limited to the environment having a chip or die, invention II reciting a structure can be utilized in many environments including those that are non-electric and strictly mechanical in nature. A "structure" with a clamp could be many typos of devices things.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. V. Clark whose telephone number is 571 272-1725.
